

EUGA Junior Internship Program

Overview

A EUGA Junior Internship Award for a European trainee in Obstetrics and Gynaecology is launched with the aim of increasing the mobility of trainees and young specialists between EUGA-accredited centres and to learn more about urogynaecology 'on the ground'.

The EUGA Trainee Committee is excited about this project and hopes to encourage European trainees to participate!

EUGA will award one trainee per year with a grant of 5000 euros for a stay of three to six months in an EUGA accredited or EBCOG accredited centre abroad. The internship must be completed in the same year in which it is awarded. Specific guidelines and/or deadlines will be made available on the EUGA website.

Requirements

Interested candidates should be current trainees in obstetrics and gynaecology or have completed their training in the last two years in an EBCOG member country (see www.ebcog.eu/council for a list of member countries).

The aim of the internship is to expose trainees to urogynaecology and its new medical and surgical treatment modalities.

The internship must take place in an EUGA accredited or EBCOG accredited obstetrics and gynaecology training centre. A list of accredited centres can be found on the EUGA and EBCOG websites. The internship should be completed in the same year as the award. The awardee will present the experience at the next EUGA Congress after the internship has been completed.

Obligations

EUGA shall assist any applicant in obtaining an internship in the accredited center of their choice but cannot guarantee the availability of a hosting center for the internship programme. The host centre will provide the trainee with a tutor throughout the internship, as well as a list of departmental and national requirements for organising the internship. The learning objectives of the trainee should be decided on an individual basis and defined at the beginning of the internship.

Before application the following arrangements must be made:

Candidates are expected to personally contact the hospital where they wish to complete the internship to ensure the feasibility of the internship **PRIOR** to applying for the EUGA Junior Internship.

The Head of the Department from the hospital that the trainee will be leaving to complete their internship has to endorse the arrangement.

The Head of the Department of the hospital the trainee wishes to complete their internship has to endorse the arrangement.

After completing the internship, the Junior Intern is expected to send a final report to EUGA Trainee Committee and EUGA Executive Board summarizing his or her activities and financial expenditures (mandatory). They are also requested to share their experiences on the EUGA websites within two months after the completion of the internship.

Application Process

Applicants are requested to send the following documents before the application deadline announced each year:

1. Application form;
2. Curriculum vitae (maximum three pages);
3. Motivation letter for the internship (maximum two pages);
4. Letter of endorsement written by the Head of the Department from the hospital that the trainee will be leaving to complete their internship;
5. Letter of endorsement (or letter of intention) written by the Head of the Department of the hospital the trainee wishes to complete their internship.

The candidacy with a **research protocol proposal** during the Internship will be highly evaluated. EUGA encourages candidates to prepare a research proposal and submit it with the required documents.

Important note: Candidates are expected to personally contact the hospital to ensure the feasibility of the internship **PRIOR** to applying for the EUGA Junior Internship program.

Additional Information

The candidate is personally responsible for planning the internship, including travel arrangements and accommodation.

Additional expenses beyond the 5000 euros grant will not be covered by EUGA.

Some, but not all, hospitals may be able to negotiate a salary. Please enquire prior to application.

Check-in with the own Department/Country whether the internship will be recognized (i.e., whether the three months spent abroad will be included as part of the official national training).

Enquire about possible language barriers (English may not be enough) and enquire about the national requirements to be more than an observer. Recognition of a medical degree/title may be required (e.g. GMC recognition is essential for working in the UK). Please appreciate that these administrative procedures may take a great deal of time to complete.

Confirm the need for liability insurance, and whether the hosting hospital will cover the trainee.

Check occupational health requirements such as MRSA swabs, hepatitis, and BCG vaccinations.

Submission

Applications for the EUGA Junior Internship will be opened after the EUGA congress of the 19-21 October 2023 in Varese! Thank you for your interest in applying.

Any further inquiries can be directed to info@eugaoffice.org.
