Presentation

This is a course about Specialized Evaluation of Pelvic Floor Disorders focus on Urodynamic tests and Ultrasound.

There is a need for the education of the Gynaecology Specialists on Urogynaecology-Pelvic Floor Dysfunctions. From the Education Committee EUGA (European Urogynaecological Association), we have assessed the necessity to educate in the advanced diagnostic techniques for patients with pelvic floor disorders,

specially Urodynamics and Ultrasound for women with urinary incontinence, pelvic organ prolapse and other urogynaecological dysfunctions. The main education aim of this course is to increase the knowledge of the gynaecologists, with special interest for Urogynaecology, in the advanced diagnostic techniques. The course will offer an overview from the basic knowledge of these techniques to advanced ones and how they can help for managing complex patient groups, as elderly, neurological, with voiding dysfunction.

Thursday
7th March 2024

Day 1: pelvic floor ultrasound

Session I: methodology

9:00 – 9:15	Welcome and introduction <i>Cristina Ros</i>
9:15 – 9:35	State of the art: evidence on imaging diagnosis pelvic floor disorders <i>Montserrat Espuña-Pons</i>
9:35 – 10:00	Technical aspects for pelvic floor ultrasound <i>Jordi Cassadó</i>

Session II: ultrasound and urinary incontinence

10:00 – 11:00	Ultrasound and urinary incontinence: how to evaluate urethral and bladder parameters, suburethral slings and clinical applications <i>Cristina Ros</i>
11:00 – 11:30	Break

Session III: ultrasound and genital prolapse

11:30 – 12:30	Ultrasound and genital prolapse: how to evaluate levator ani defects, genital prolapse and meshes
11:30 – 11:50	How to evaluate genital prolapse by ultrasound <i>Kamil Svabik</i>
11:50 – 12:10	How to evaluate levator ani defects by ultrasound <i>Jordi Cassadó</i>

Registration

 Aula Clínic

 Món Clínic
Barcelona

Thursday

7th March 2024

12:10 – 12:30

Ultrasound for the assessment of meshes for pelvic organ prolapse surgery

Cristina Ros, Kamil Svabik

Session IV: ultrasound and faecal incontinence

12:30 – 13:30

Ultrasound and faecal incontinence: how to evaluate anal sphincter complex and clinical applications

12:30 – 12:50

Anal sphincter complex by 3D-endoanal ultrasound | Cristina Ros

12:50 – 13:10

Anal sphincter complex by 2D and 3D-transperineal ultrasound | Kamil Svabik

13:10 – 13:30

Pelvic floor ultrasound and postpartum | Cristina Ros

13:30 – 14:30

Lunch

Session V: workshops: interactive and practical sessions

14:30 – 15:00

How to describe a report of pelvic floor ultrasound

Cristina Ros

15:00 – 16:30

Clinical cases: UI, POP, sling and meshes and postpartum

Cristina Ros, Jordi Cassadó, Kamil Svabik

16:30 – 17:00

Break

17:00 – 17:30

Management of slings complications

Cristina Ros

Registration

 Aula Clínic

 Món Clínic
Barcelona

Thursday
7th March 2024

17:30 – 18:00

The limits of the Pelvic floor ultrasound as a diagnostic tool in Urogynecology

Sònia Anglès, Montserrat España-Pons

End of day 1

Registration

Technical secretariat

Mireia Jiménez | mjimenez@fmcb.cat | www.aulaclinic.com

Friday
8th March 2024

Day 2: urodynamics

Session I: setting the scene

9:00 – 9:10	Welcome and introduction Montserrat Espuña-Pons
9:10 – 9:30	Understanding urodynamics: a basic science perspective Montserrat Espuña-Pons
9:30 – 9:50	Lower urinary tract terminology and good urodynamics practice (ICS) Dudley Robinson

9:50 – 10:10	Indications for urodynamics Dudley Robinson
10:10 – 10:30	Initial assessment and management of lower urinary tract dysfunction Angela Rantell
10:30 – 11:00	Clinical cases: initial assessment and indications for urodynamics Sònia Anglès, Montserrat Espuña-Pons
11:00 – 11:30	Break
Session II: urodynamic investigations: simple to complex	
11:30 – 11:50	The role of basic urodynamics: uroflowmetry, filling cystometry, pressure flow studies Angela Rantell

Registration

Technical secretariat
Mireia Jiménez | mjimenez@fmcb.cat | www.aulaclinic.com

Friday

8th March 2024

11:50 – 12:10

The role of advanced urodynamics: videocystourethrography, ambulatory urodynamics, urethral function testing

Dudley Robinson

12:10 – 12:30

Managing specialist patient groups: elderly patients, neurological patients, urogenital prolapse, voiding dysfunction

Dudley Robinson, Angela Rantell

12:30 – 13:30

Clinical cases

Sònia Anglès, Montserrat Espuña-Pons

13:30 – 14:30

Lunch

Session III: workshops

14:30 – 15:00

Setting up the equipment and trouble shooting. Systematic approach to reporting (Good UDS Practice)

Angela Rantell

15:00 – 15:30

Video demonstrations: videourodynamics, ambulatory UDS, urethral pressure profilometry

Dudley Robinson

15:30 – 16:00

Systematic approach to interpretation of standard traces

Sònia Anglès, Montserrat Espuña-Pons

16:00 – 16:30

How to describe a report of urodynamics

Sònia Anglès

16:30 – 17:00

Take home messages

Sònia Anglès, Montserrat Espuña-Pons, Cristina Ros
